# LIVING 2021

Light is essential to our lives and it is impossible to imagine existing without it. Besides serving a functional purpose, it also has a huge impact on our well-being and happiness. We want to inspire you to use light as a decoration to create a happy and calm atmosphere in your home.

Our designs are rooted in the nordic design culture and characterised by their simplicity and clean lines. As a design house, we develop our products in collaboration with designers. Our product designs always start with what the consumer needs, in terms of functionality, usability and appearance.

Sometimes the best room isn't a room at all! Living 2021 focuses on the outdoor room. When decorated, a terrace or garden can become an extra room and a special place for you to enjoy with your family and friends.

Sirius offers endless possibilities. Decorate your garden table with LED candles and glass products or use our light chains to set the perfect frame in your garden or terrace during the summer nights to create calm and soft, glowing atmosphere.

For more than four decades, Sirius has brought joy to homes worldwide with our light decorations and we look forward to continuing this journey together with you.

Light is living. Welcome to the Living collection 2021.

# LOCATION

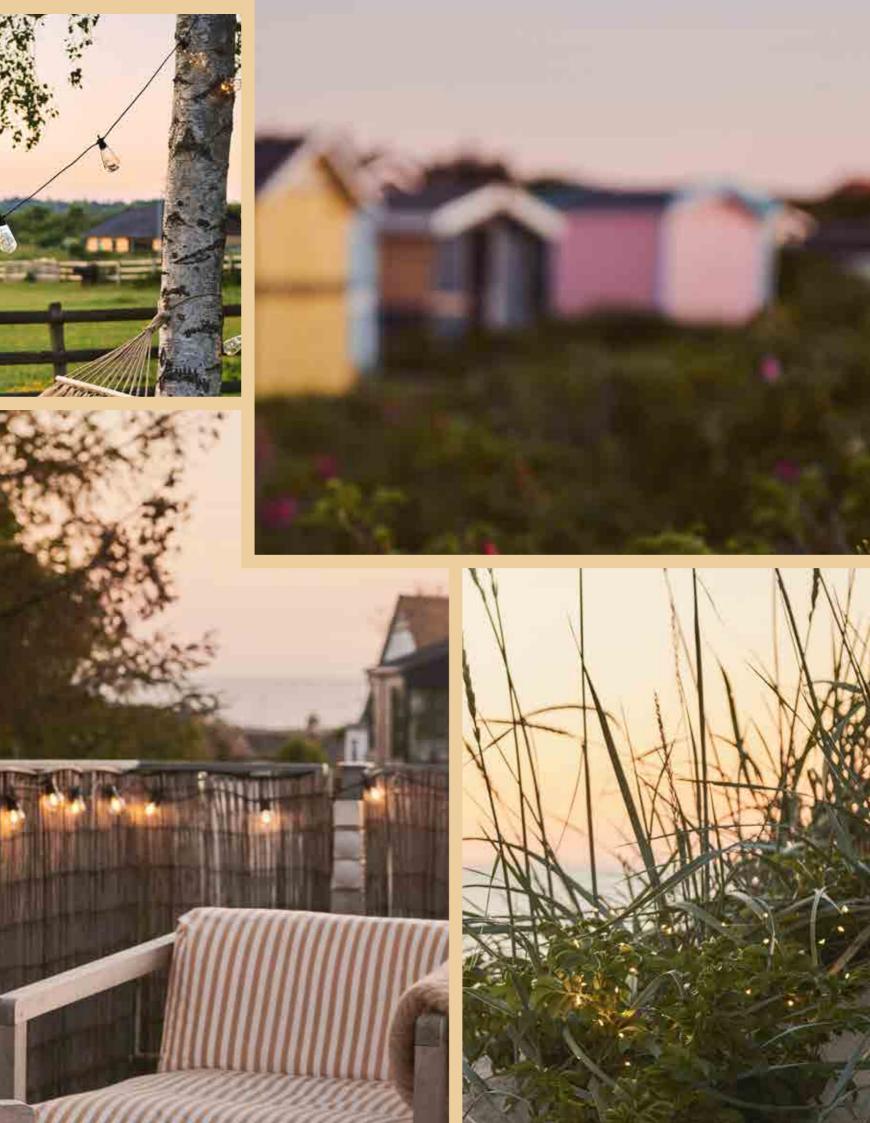

For this year's Living collection we wanted a location with a sustainable profile, while capturing the danish summer vibe.

One of the places we visited was the sustainable ecological farm "Rabarbergaarden". They have everything the heart desires when it comes to plants, farm animals and culinary experiences.

We also visited the beautiful coastal town of Tisvilde. One of the unique locations we used was the Tisvilde beach houses in the dunes.

We think that these locations delivered the result we were looking for – the sustainable feeling of "Rabarbergaarden" and the magical touch of Tisvilde.

### SIRIUS

# GREEN ENERGY

### Advantages of solar panels

- Environmentally friendly
- Practical with no wire
- Move around your solar panel item as you like
- Easy to use

### Start to use your solar panel

- Remove the protective film from the solar panel.
- Switch to ON
- Make sure the solar panel is placed in direct sun.
- Your product is ready to use after charging in direct sun for more than 2 hours.

### Take care of your product

 Make sure to clean the solar panel with pure water when dirty.

### Daily use

- The use of solar panel product is easy you do not need to turn ON and OFF. The solar panel will light up when dark and turn off when light outside.
- The Solar Panel product will light up for approximately 8 hours when fully charged.

### TIP

- Make sure the solar panel product is not placed near a source of night when it is dark outside. This will deteriorate the effect of the solar panel.
- In the winter time, your solar panel product will still work if there is enough sunlight for it to charge. It may have lower light effect, this does not mean the product is bad.

## Adam Solar

Create outdoor coziness with Adam, a stylish LED solar lantern in glass added a leather handle. Adam is both sustainable and functional as it turns on automatically after the sun has set. After charging for 2 hours in the sun, Adam will light up for approximately 8 hours. The batteries can be recharged up to 500 times. Design by Peter Boldsen.

## **Batteries**

DecoPower by Sirius is a range of Alkaline batteries for easy additional sales. Suits all products and is sold in 6 pcs sets, packed in a display of 20 sets.

Rechargeable DecoPower by Sirius is a new range of rechargeable batteries for a more environmentally friendly use of battery driven LED products. You can buy the "start set" with the DecoPower USB charger incl. 4 pcs batteries. You can also supply with a 4 pcs set of rechargeable batteries, either AA or AAA. The DecoPower USB charger is universal and can be used for AA and AAA rechargeable batteries.

The DecoPower Adapter makes it possible to drive battery products on regular power. Insert the battery with the wire attached and fill up the battery box with additional dummy batteries.

## Sirius **Battery Holders**

Sirius does its best to integrate the battery holders as part of the products.

Having the battery holder as an integrated part of the product makes the batteries less visible and adds exclusivity to our products. Sirius' uniquely designed battery holders thereby become a part of the decoration and make decorating functional as well as beautiful.

## Sirius' Collection COMES IN 4-COLOURED BOXES

Sirius' blue coloured boxes in high quality and simple, tasteful design, unify all items and gives the Sirius collection a stylish appearance and salability in stores.

Space management and successful exposure is made easy with stable, yet delicate gift boxes, as well as our new display solution, which attracts a lot of attention having proven to boost sales significantly.

All low and high voltage products are delivered with an extensive user manual in seven languages, and inside our designer gift boxes you can also find a nice, colour leaflet. The leaflet features inspiration and ideas, as well as a variety of information about the particular range.
